Imprimerie: « *E. Ariani* » *e* « *L'Arte della Stampa* » *– Firenze (Italie).*

TABLES DES MATIÈRES

FASCICULE 1, JANVIER 1964

1. Site and mode of termination of primary vestibulocerebellar fibres in the cat. An experimental study with silver impregnation methods. A. Brodal and B. Høivik. Pag. 1
2. Neurophysiological analysis of the " mobbing response " in the chaffinch (fringilla coelebs). P. Strata 22
3. The problem of a true consensual light reflex in birds. G. Berlucchi and P. Strata 29
4. Dispositif de contention stereotaxique rigide du pigeon. P. Gogan 36
5. Effect of alveolar ventilation on the EEG of the " encéphale isolé " cat. M. Abeles, J. Magnes and S. Samueloff . . 40
6. Respiratory control of motoneurones of the recurrent laryngeal nerve and hypocapnic apnoea. R. Bianconi and F. Raschi 56
7. Direct extracellular polarization of cortical neurons with multibarreled microelectrodes. R. Spehlmann and H. Kapp. 74

Analyses 95

FASCICULE 2, AVRIL 1964

1. Research on the structure and physiology of the eyes of a lycosid spider. – I. Microscopic and ultramicroscopic structure. B. Baccetti and C. Bedini . . . . . Pag. 97
2. Research on the structure and physiology of the eyes of a lycosid spider. – II. The role of different pairs of eyes in astronomical orientation. F. Magni, F. Papi, H. E. Savely and P. Tongiorgi. 123
3. A comparative study of ascending spinal tracts activated from hindlimb afferents in monkey and dog. O. Oscarsson, I. Rosén and N. Uddenberg 137
4. An analysis of evoked cerebellar activity. I Suda and T. Amano 156

5. Electrocortical desynchronization resulting from spinal block: evidence fors synchronizing influences in the cervical cord. R. Hodes . . . . . Pag. 183

6. Pyramidal and extrapyramidal modulation of somatosensory activity in gracile and cuneate nuclei. M. Levitt, M. Carreras, C. N. Liu and W. W. Chambers 197

7. Pupil behavior and ocular movements during synchronized and desynchronized sleep. G. Berlucchi, G. Moruzzi, G. Salvi and P. Strata 230

8. Supraspinal modulation of heteronymous monosynaptic and of polysynaptic reflexes during natural sleep and wakefulness. S. Giaquinto, O. Pompeiano and I. Somogyi. . 245

9. Descending inhibitory influences on spinal reflexes during natural sleep. S. Giaquinto, O. Pompeiano and I. Somogyi 282

10. Spontaneous activity of single vestibular neurons of unrestrained cats during sleep and wakefulness. E. Bizzi, O. Pompeiano and I. Somogyi 308

Analyses 331

FASCICULE 3, JUILLET 1964

1. Etude électrophysiologique de la convergence binoculaire dans l'aire visuelle corticale du chat. F. Bremer. Pag. 333

2. EEG and behavioral effects elicited by cooling of medulla and pons. G. Berlucchi, L. Maffei, G. Moruzzi and P. Strata 372

3. Inhibition of proprioceptive spinal reflexes induced by cutaneous afferent volleys in unrestrained cats. S. Giaquinto and O. Pompeiano 393

4. Cortical control of brain stem reticular neurons. F. Magni and W. D. Willis 418

5. Subcortical and peripheral control of brain stem reticular neurons. F. Magni and W. D. Willins 434

6. Phasic changes in muscular activity during desynchronized sleep in unrestrained cats. An analysis of the pattern and organization of myoclonic twitches. M. M. Gassel, P. L. Marchiafava and O. Pompeiano 449

7. Tonic and phasic inhibition of spinal reflexes during deep, desynchronized sleep in unrestrained cats. M. M. Gassel, P. L. Marchiafava and O. Pompeiano 471

8. Pyramidal influences on spinal cord during desynchronized sleep. P. L. Marchiafava and O. Pompeiano. . Pag. 500

9. Phasic changes in blood pressure and heart rate during the rapid eye movement episodes of desynchronized sleep in unrestrained cats. M. M. Gassel, B. Ghelarducci, P. L. Marchiafava and O. Pompeiano 530

Analyse 545

FASCICULE 4, NOVEMBRE 1964

1. Spontaneous desynchronization in the chronic cat " cerveau isolé ". H. L. Batsel . . . . . Pag. 547

2. Effect of sodium deficiency on the intracellular potentials of the guinea-pig heart. A. Ferroni and E. M. Meda . . 567

3. EEG patterns of arousal and sleep induced by stimulating various amygdaloid levels in the cat. A. Kreindler and M. Steriade 576

4. Cortical sensory and motor areas of the guinea-pig (" Cavia porcellus "). H. P. Zeigler 587

5. Sudomotor activity induced by single shock stimulation of the hypothalamus in anesthetized cats. G. G. Celesia and G. H. Wang 599

6. Peripheral factors in the study of the habituation of the cortical responses to photic stimulation. M. Palestini, R. Gallardo and V. Armengol 608

7. Accommodation of the eye as related to behavior in the cat. R. Elul and P. L. Marchiafava 616

8. Eye nystagmus elicited by stimulation of the cerebral cortex in the rabbit. E. Manni, G. B. Azzena and C. Desole. 645

9. Changes in the auditory input in wakefulness and during the synchronized and desynchronized stages of sleep. W. Baust, G. Berlucchi and G. Moruzzi 657

10. Changes in the auditory input during arousal in cats with tenotomized middle ear muscles. W. Baust, G. Berlucchi and G. Moruzzi 675

11. Reflex response to clicks of cat's tensor tympani during sleep and wakefulness and the influence thereon of the auditory cortex. W. Baust and G. Berlucchi 686

12. Pathways of oxidation of reduced nicotinamide nucleotides in cerebral tissue. A. Giuditta 713

Analyses 742
